Restriction/Elections

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, 17, 9-12, 19, drawn to frame length, classified in class 370, subclass 470.
 - II. Claims 5-8, 18, 13-16 and 20, drawn to transmission of a single message having multiple packets, classified in class 370, subclass 473.
2. Inventions I and II are related as combination and subcombination. Invention in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combination (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of subcombination as claimed because group I does not require the particulars of group II for patentability and that group I or II as the subcombination has utility by itself.
3. Because these inventions are distinct of the reasons given above and have acquired a separate status in the art shown by their different classification because of their recognized divergent subject matter, and the search required for each Group I and II is not required for other Group, restriction for examination purpose as indicated is proper.
